

Full Time Position: Logistics and Procurement Professional

Company: C-Power (Columbia Power Technologies, Inc.) is a worldwide leader in ocean energy systems. We are developing and commercializing next-generation solutions that will deliver the qualities our customers need to reduce the cost, complexity, and carbon-intensity of their operations. Our systems are scalable and deployable in a wide range of applications, from powering oceanographic sensors to generating megawatt-scale electricity.

Job Description: The Logistics and Procurement Professional is responsible for efficiently coordinating national and international shipments, ordering parts and equipment, and communicating with vendors in a timely and professional manner. The professional will oversee all purchasing, transportation, inventory, and warehousing associated with C-Power's wave power systems.

Duties & Responsibilities:

- Effective communication with internal team members, suppliers, and customers
- Responsible for procurement, logistics, quality assurance, quality control, and transportation of components and finished goods against time and budget
- Manage procurement and inventory systems
- Responsible for rate negotiations
- Analyze industry and demand trends and support senior management with the development and implementation of sourcing strategies

Job Location: Must be US-based. C-Power's engineering office is located in Corvallis, OR. Remote operation/telecommuting maintaining a Pacific Time schedule is allowed.

Travel: Travel in conformance to GSA regulations is expected

Compensation: Salary commensurate with education and experience. Employment sponsorship is not available.

Required Education: Associate degree in business administration, supply chain management or a similar field from accredited institution is preferred and minimum three years of logistics management is required.

Qualifications, Skills and Experience:

- Proven record managing shipments in accordance with state and federal regulations and hazardous material labeling requirements
- Knowledge of 49 CFR, 15 CFR, Department of Transportation (DOT), International Air Transport Association (IATA), and International Maritime Dangerous Goods (IMDG) regulations preferred
- Prior global shipping management experience is highly desirable
- Competent with MS-Office 365 applications

Additional Experience Desired:

- Experience with government contracts
- Enthusiasm for renewable energy

To be considered for this position, please submit your resume and a cover letter indicating how you can contribute to the ongoing success and technical development of C-Power to careers@cpower.co.
